Fruit Catcher Repair Lab — Deliverables

1. Before-Change Gameplay Video

A 10-second gameplay video showing the original game before the changes.

The video demonstrates the original floor-miss bug where a fruit falling past the bottom of the screen incorrectly increases the score instead of deducting a life.

LINK: <C:\Users\admin\OneDrive\Pictures\Camera Roll\game record .mp4>

2. After-Change Gameplay Video

A 10-second gameplay video showing the repaired and enhanced game.

The video demonstrates the implemented tasks:

- Task 1: Corrected missed-fruit scoring and life deduction.
- Task 2: Added rotten fruit / hazard bombs.
- Task 3: Added dynamic falling-speed and spawn-rate escalation.
- Task 4: Added fruit splash particle effects.
- Game Over occurs when all 3 lives are lost.
- Pressing R restarts the game and resets the score and lives.

4. Task Completion Summary

Task	Description	Status
Task 1	Fix floor miss scoring and life deduction	Completed
Task 2	Add rotten fruit / hazard bombs	Completed
Task 3	Add dynamic falling speed escalation	Completed
Task 4	Add fruit splash particle effects	Completed

5. Testing

The repaired game was executed locally using Python and Pygame.

The following behaviors were tested:

- Normal fruits can be caught by the basket.
- Successfully caught fruits increase the score by 1.
- Missed fruits decrease the player's lives by 1.
- Hazard fruits decrease the player's lives when caught.
- Hazard fruits do not increase the score.
- Falling speed increases as the score increases.
- The spawn delay decreases as the score increases.
- Particle effects appear when fruits are caught or missed.
- Game Over appears when all three lives are lost.
- The game stops updating after Game Over.
- Pressing R restarts the game with 3 lives and a score of 0.

6. Project Safety / Repository

The original source repository was cloned before making modifications.

The repairs were performed in a separate working copy and pushed to the student's own GitHub repository.

Original repository: SETAPESU26/64_fruit_catcher

Student repository: NIKHIL-KR-322/Fruit-catcher
